

PRESS RELEASE
IDETA joins the Plugsurfing network

BERLIN, 08.11.17 - IDETA, territorial development agency in Picardy Wallonia, is joining forces with Plugsurfing. This collaboration will add 48 new charging stations to the Plugsurfing network in Belgium and will allow Walloons to travel around Europe effortlessly thanks to the 54,000 Plugsurfing charging points.

Plugsurfing is delighted by this new partnership and the positive spin-offs it will offer: a European mobility aid for the Walloons as well as an attraction for this region located at the heart of Europe. The charging stations are accessible through the [Plugsurfing app](#), the [charging key](#) and direct payment through Scan & Charge on compatible stations.

“As part of the deployment of our network of charging stations for EVs in Picardy Wallonia, we finally found a partner offering a service adapted to our needs for payment management.”, says IDETA’s director CEO Olivier Bontems. “This opportunity offers flexibility and we hope it will give visibility to our network beyond our territory.”

IDETA, territorial development agency, works for the energy transition of Picardy Wallonia. This involves developing an energy mix for renewable energies (wind, biomass, solar energy, etc.), but also by changing our behavior, reducing our consumption and developing alternatives to the carbon economy: electric and gas vehicles are therefore both in focal point.

"Our partnership enables businesses and public entities in Wallonia to benefit from a turnkey solution open to the whole Europe: installation of infrastructure, management, simple and reliable invoicing. We encourage interested companies to contact IDETA or Plugsurfing as soon as possible." - Quentin Ducreux Lerebours, commercial director at Plugsurfing.

About Plugsurfing

Plugsurfing is Europe's largest charging network, covering 53.000+ charging points in 24 countries. As a strong partner of car manufacturers, fleet operators and leasing companies, Plugsurfing ensures seamless access to charging points and easy payment for any electric car driver.

We believe that technology can solve problems that really matter. Creating products like Plugsurfing can make the world a more efficient and greener place. Plugsurfing was founded by Adam Woolway and Jacob van Zonneveld in 2012 and is located in Berlin since then.
