

PLUGSURFING PUTS JAGUAR AND LAND ROVER DRIVERS ON THE ROAD TO EASIER CHARGING

- Jaguar I-PACE, Range Rover PHEV and Range Rover Sport PHEV customers to benefit from new premium charging service
- 70,000 charging points throughout mainland Europe available with Plugsurfing partnership
- Use apps to find available charging points and pay with exclusive card
- All-electric Jaguar I-PACE performance SUV available now

17th July 2018, Berlin, Germany – Jaguar Land Rover has partnered with Plugsurfing to supply a premium charging service for its electric vehicles in selected markets in Europe.

Drivers choosing an all-electric Jaguar I-PACE performance SUV will be given free access to the [Jaguar Public Charging app](#), whilst Range Rover or Range Rover Sport plug-in petrol-electric hybrid (PHEV) customers can download the [Land Rover Public Charging app](#) for free. Both apps easily locate 70,000 charging points and pay for the charging session. Customers will also receive a universal charging card that allows them to use most charging points across Europe.

Through the apps, Jaguar and Land Rover electric vehicle drivers can see whether a charging station is available or occupied. Drivers can choose to rapid charge before reaching their destination or charge at normal speed upon arrival.

Mick Cameron, Head of e-Mobility, Jaguar Land Rover, said: “We are aiming to simplify the charging process through simple accessibility, usability and payment in one solution. With the number of accessible charging points rapidly growing as new operators work with the Plugsurfing network in major markets throughout Europe, it helps our customers to be working with the leading provider.”

Jacob van Zonneveld, CEO, Plugsurfing, said: “Everyone switching to an electric vehicle asks, ‘where do I charge my car?’ Thanks to this partnership with Jaguar Land Rover, we are able to remove one of the largest barriers to switching to an electric vehicle. We know that another barrier to switching is the availability of charging infrastructure for electric vehicles. Plugsurfing is working to influence and drive infrastructure policy to expand the number of charging points available across Europe for Jaguar and Land Rover users.”

There are two packages on offer - a fixed monthly fee or Pay As You Go. Each package, which includes the universal charging key and app download information, is available through the Jaguar and Land Rover retailer network.

From 2020 all new Jaguar Land Rover vehicles will be electrified. A portfolio of electrified products across the model range will embrace fully electric, plug-in hybrid and mild hybrid vehicles, giving customers even more choice.

ENDS

Editors' notes:

- To download the Jaguar Public Charging app, please [click here for iOS](#) and [click here for Android](#).
- To download the Land Rover Public Charging app, please [click here for iOS](#) and [click here for Android](#).
- The Jaguar Public Charging app and the Land Rover Public Charging app is available for download now.

- This Plugsurfing service is available throughout mainland Europe, with the Jaguar and Land Rover Public Charging apps being initially launched in: Belgium, Netherlands, Luxemburg, Germany, Austria, Switzerland, Finland and the Czech Republic.
- There are two packages on offer – a fixed monthly fee or a Pay As You Go option. The monthly package rate varies depending on the country, but will give the customer 30 mins free DC and 60 mins free AC charge, every time the customer plugs in.
- Range Rover Sport PHEV combines electric and petrol power for sustainable performance:
 - Total power / torque output: 404PS (297kW) / 640Nm
 - Combined fuel economy*: 88.3mpg (3.2 l/100km)
 - Combined CO2 emissions*: 73g/km
 - Electric-only range up to: 31 miles (51km)
 - Rapid charging time: 2 hours 45 minutes
 - *CO2 figure and fuel economy based on NEDC Equivalent testing, Tyre Class 2. 2019 model year manufacturers estimates.
- The Jaguar I-PACE delivers sports car performance, next-generation artificial intelligence (AI) technology and five-seat SUV practicality to place Jaguar at the forefront of the EV revolution:
 - The new all-electric I-PACE is available to order now, with first customers deliveries starting this summer
 - Designed from the outset as an electric vehicle (EV), the I-PACE offers bold aero-efficient design, and interior space for five adults and luggage
 - Electrifying all-wheel drive performance from twin Jaguar-designed motors with a combined 400PS and 696Nm delivering 0-60mph in 4.5s
 - 90kWh Lithium-ion battery delivers up to 298 mile range*, with EV navigation to ensure range-optimised routing (**WLTP measurement*)
 - Bespoke EV aluminium architecture delivers Jaguar's most rigid body structure with 50:50 weight distribution
 - Rapid public charging from 0-80% in 40-minutes, with 15-minutes charge giving up to 100km range** (***100kW DC charging*)

About Jaguar Land Rover

Jaguar Land Rover is the UK's largest automotive manufacturer, built around two iconic British car brands: Land Rover, the world's leading manufacturer of premium all-wheel-drive vehicles; and Jaguar, one of the world's premier luxury sports saloon and sports car marques.

We employ more than 44,000 people globally and support around 240,000 more through our retailer network, suppliers and local businesses. Manufacturing is centred in the UK, with additional plants in China, Brazil, Austria and Slovakia.

At Jaguar Land Rover, we are driven by a desire to deliver class-leading vehicles, which will provide experiences our customers will love, for life. Our products are in demand around the globe. In 2017

Jaguar Land Rover sold 621,109 vehicles in 130 countries, with more than 80 per cent of our vehicles being sold abroad.

Our innovation is continuous: we will spend in the region of £4.5 billion this year on new product creation and capital expenditure.

From 2020 all new Jaguar Land Rover vehicles will be electrified, giving our customers even more choice. We will introduce a portfolio of electrified products across our model range, embracing fully electric, plug-in hybrid and mild hybrid vehicles as well as continuing to offer ultra-clean petrol and diesel engines.

About Plugsurfing

Plugsurfing is Europe's largest charging network, covering 70,000+ charging points in 30 countries. As a strong partner of car manufacturers, fleet operators and leasing companies, Plugsurfing ensures seamless access to charging points and easy payment for any electric car driver.

We believe that technology can solve problems that really matter. Creating products like Plugsurfing can make the world a more efficient and greener place. Plugsurfing was founded by Adam Woolway and Jacob van Zonneveld in 2012 and is located in Berlin. Since 2018, Plugsurfing has been owned by Finnish utility company [Fortum Oyj](#).
