

## **PlugSurfing welcomes newcomer E.On to its charging network**

*PlugSurfing captures “big four” in Germany, after Vattenfall, EnBW and Innogy.*

Berlin, 01.09.2017 PlugSurfing is happy to announce to all EV Drivers that E.On’s first 11 charging stations are accessible with the PlugSurfing app and charging key.

'We are continually breaking down the barriers of EV charging', says PlugSurfing's Chargepoint Network Manager Csilla Góczy, 'and are delighted that E.On has realized the future is with electric cars, and is recognizing the clear benefits for them by opening their networks to our large community of PlugSurfers.'

It is well appreciated that the German “Big Four” utilities have chosen the path of eMobility. Intelligent charging and automatic payment solution providers as PlugSurfing will ensure an uptake at every charging station and significantly lower the customer acquisition costs for any utility.

PlugSurfing is Europe’s largest charging network, covering 50.000+ charging points in 24 countries. As a strong partner of car manufacturers, fleet operators and leasing companies, PlugSurfing ensures seamless access and payment for any electric car driver. It has developed its own standard for payment and charging, called OI/OI, which is used by major utilities across Europe.
